

## Dolphicam Grid Tool

The Dolphicam Grid Tool is a mechanical positioning device for the Dolphicam Ultrasound Camera that makes it easy and quick to inspect large areas. Its solid construction from high-quality linear bearings ensures smooth scanning, high precision, and high inspection speeds.

### Features:

- Scanning rate of less than 5 secs/image, about 30 minutes for a 50 x 50 cm area!
- Set-up time of less than 3 minutes
- The Dolphicam2 is easily secured to the grid tool with 3 set screws and the attachment is hinged to allow access to non-planar surfaces.
- Can easily be positioned in 25mm incremental positions over a full 50 x 50 cm area.
- Ball plunger secures the GridTool into position - no movement before or during shot.
- It is fixed to the surface by one or two robust oversized suction cups, that can be removed for bolted placement.
- The Dolphicam software allows for multiple scanning modes, including various vertical and horizontal modes as well as other features, making real-world stitching easy and fun.
- Comes in robust transport box

### Specifications:

Weight	2kg / 4.41lbs
Scanning Increment	2mm / 0.98"
Scanning Area	50 x 50cm / 16.69 x 16.69"
Fixture	1 or 2 suction cups, or bolted to surface
