

BANDIT

Automated Inspection System

Feature packed with new innovative technology, the Bandit automated 2-axis NDT scanner can raster scan up to 30" per second. Capable of scanning from 2" diameter pipe to flat surfaces, and 6" diameter in the axial direction. The AUT Bandits' modular design means switching arms or motors takes only a few minutes and can be done in the field.

- Fast - X: 6"/sec – Y: 30"/sec
- Modular - Easy to change configurations
- Lightweight - 10.5lbs
- Low profile - 3.125" H
- Rugged - Easy placement & removal with magnet release lever
- Practical - Circumferential O.D. Scans: 2"+
