

The Specialist in Advanced NDT

HANDSCAN

Encoded Phased Array Clamping Scanner

The AUT Solutions HandScan is a low-cost tool for performing single axis encoded scanning. Small in size and simple to use, the HandScan allows the technician to set up quickly and easily. The Dual Force clamping system is effective at holding wedges up to 56mm wide.

- Precision machined anodized aluminum
- Dual Force wedge clamping system
- Tool-less operation
- Lifetime warranty on the encoder
- 5 encoder positions (2 Transverse)
- Magnetic soft contact encoder wheel
- P68 Waterproof
- Connectors available for all current ultrasonic flaw detectors
