Mi-Glow® 783 is Mi-Glow® 800 fluorescent yellow-green particles that have been mixed with liquid wetting agent 483 for use in water media. This advanced formulation is borate-free and allows for superior corrosion protection, wetting and particle mobility. It's designed to be used with UV-A light to detect very fine discontinuities in finished products such as tears, non-metallic inclusions, shrinkage, laps and seams located on or near the surface.
