

Circle Systems, Inc.

CircleSonic General Purpose Couplant is a high-performance, water-based gel designed for ultrasonic inspections. The advanced formulation provides consistent acoustic transmission, exceptional corrosion resistance, and reliable performance for a wide range of industrial applications.

Safe for operators and environmentally friendly. Reduced residue for easy cleanup.

Delivers optimal ultrasonic signal transmission with minimal loss to ensure clear, accurate, and repeatable inspection results.

Clings to vertical and overhead surfaces without dripping, yet flows smoothly when pressure is applied for controlled application.

- Container sizes 4oz, 12oz, 1 gal
- Low Residue, quick clean-up
- Excellent Corrosion Protection
- Operating Range: 10° - 220°F
- ASME B&PV Code Compliant
- One Year Shelf Life*

*Shelf life has been established through accelerated stability testing. Real-time testing is underway, aiming to confirm and extend the shelf life to two years.
