- Basic advantages:**
- Intuitive user-friendly interface;
 - Easy viewing of test results for each frequency mode (Frequency №1, Frequency №2 & Mix);
 - Generation and storage of electronic reports;
 - Data output for each detected flaw, such as:
 - flaw location coordinate on a defectogram;
 - signal amplitude and phase;
 - flaw depth.
- The resulting electronic report contains

- all basic data on the test performed, such as:
- name of company, NDT department and inspector who performed the test;
 - description of test object;
 - all setting parameters of the instrument at the time of inspection;
 - parameters of signals coming from defects (amplitude, phase, depth);
 - representation of the signals from defects in a complex plane or strip chart;
