

## Application note: Eishin HM-52L Corner Yoke Weight Test

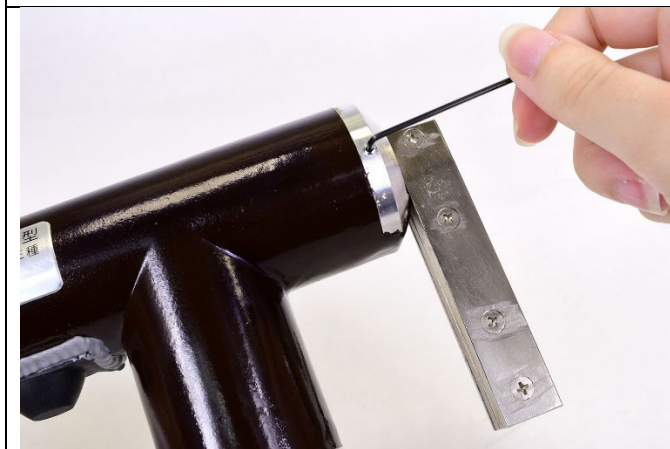

Eishin has discontinued the special “L” shaped 10# Test Bar. They now include an Adapter Bar which is a small, laminated bar that attaches to the HM-52L and allows it to be used with a standard 10# test bar for verification of lifting strength as shown below.

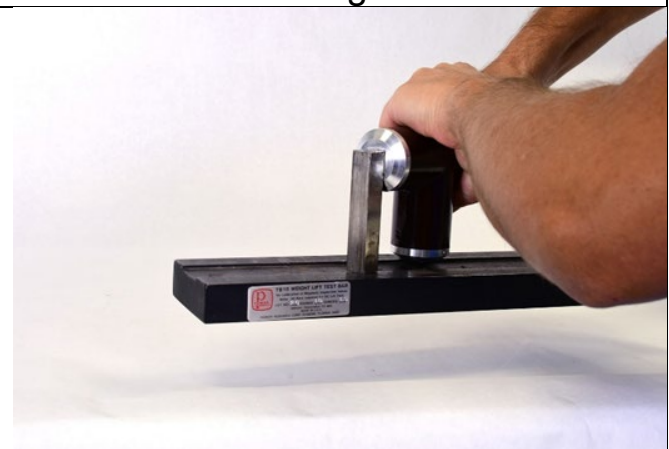

HM-52L Corner Yoke Kit

HM-52L with Adapter Bar and 10# Test Weight Bar

Attaching the Adapter Bar to the HM-52L with supplied Allen Wrench

Testing HM-52L 10# lifting capability
