

7.3 IR Emitters

Phoenix offer a range of infrared emitters that can be fitted temporarily or permanently to the range of corrosion mapping probes. These emitters when used in conjunction with a C-Scan system enable accurate corrosion maps to be generated whilst still scanning the work piece manually.

- Supplied as standard with Lemo 00 connectors S
- applied with 2m cable

IR Emitter 6mm

IR Emitter 10mm

IR Emitter 20mm

Product Code	Description	Attachment
DEM-6	Infrared emitter for 6mm range	Push fit onto 10mm dia probe
DEM-6-G	Infrared emitter	Glued on to any probe
DEM-10	Infrared emitter for 10mm range	Push fit onto 10-18mm dia probes
DEM-20	Infrared emitter for 20mm range	Push fit onto 29mm dia probe maximum
DEM-P	Infrared emitter for 10mm range	Permanent fitting to SSTC 4/10 Probe
