

King Pin Tester™

METAL HARDNESS TESTING MADE EASY

The King Pin Tester™ brings the power of Brinell testing right to your hands. Designed for convenience and precision, this innovative tool uses a simple hammer strike to create an indentation on metal surfaces. The calibrated King Pins™ are engineered to shear at 1580 kgf, ensuring consistent and reliable results every time. Great for hard to reach areas.

Benefits

- Economical alternative for testing
- Test on large and odd-shaped parts
- Durable, long lasting metal handle
- Streamlined design enhances efficiency
- Includes everything needed for testing

Precise

- King Pins™ feature less than 1% tolerance
- LED magnifier enhances the examination of the impression
- Consistent results regardless of operator experience

Kit Includes:

- Industrial Strength Carrying Case
- King Pin Tester™
 - Handle
 - Indenters (Steel & Carbide)
 - Indenter Holder
- King Pins™
- Magnifier
