KOWOPRO K series X-Ray film processors

These processors are designed for easy manual processing of X-Ray films. The complete unit is made of strong grey PVC material. Three tanks at the left for developer, rinse water and fixer are placed in the heating tank bath which can be heated or cooled. The large tank at the right is for final wash of fixed films or also for washing channel hangers. A microprocessor controls heating and water level in heat bath tank and also can be used as darkroom timer. For permanent fresh water supply in the rinse and end water tank there are separate water taps and over flows. Third tap is for cooling the developer and fixer if necessary.

Specification:
- Housing made from 7 mm thick PVC
- Water taps for rinse, end wash and heating bath
- microprocessor controller for heating and water level, darkroom timer
- 800 W heating

KOWOPRO K21
25 l tank - 410x120x570 mm - developer, rinse, fixer
75 l tank - 273x480x670 mm - final wash
85x71x93 cm (WxDxH), 60/260 kg
Article no. 12 30530

KOWOPRO K31
25 l tank - 410x120x570 mm - developer, rinse, fixer
110 l tank - 393x480x670 mm - final wash
97x71x93 cm (WxDxH), 65/300 kg
Article no. 12 30540

KOWOPRO K41
55 l tank - 410x250x570 mm - developer, rinse, fixer
520 l tank - 520x480x670 mm - final wash
148x71x93 cm (WxDxH), 85/460 kg
Article no. 12 30550

TE 22PK X-Ray film processor

This processor is designed for manual processing of X-Ray films for the use in mobile laboratories. The outer waterproof tank contains five separately removeable processing tanks.

Specification:
22,5l tank - 330x120x585 mm
for developer, rinse, fixer, pre and final wash
96x40x70 cm (WxDxH), 48/160kg
Article no. 12 30630

Accessories:
Mounting frame for installation in vehicles
Article no. 12 30657

Water supply armature
Article no. 12 30658

Base rack
Article no. 12 30655
