- Custom Switch Panels

General Specifications:

Length (outside)	99"
Height (outside)	64"
Width (outside)	60"
Weight (dry)	915lbs

All of the Armorlite RT labs now have the option of running our high efficiency AC units. These 6000 BTU units will keep your lab cool in the higher summer temperatures and require zero modifications to the vehicle!

The RT3 also includes many features suggested by our operators in the field. Some of these additions include:

- Magnetic dryer lid holds
- USB Charging ports
- Marine bluetooth stereo (optional)
- Easy slide lead shielded storage vault
- Smart valve for simple temperature regulation inside the lab

Every RT3 unit is built to our exacting standards with consistency throughout. This detail ensures that modifications to your fleet are easy, and removes all guess work if any future repairs or additions become necessary.
