Versatile, Dual-Intensity, Multi-LED, Broad-Beam NDT Inspection Lamps!

QUADRAN<sup>™</sup> 365 Series NDT lamps feature four ultra-hi-flux UV-A LEDs <u>plus</u> a convenient white light LED to quickly switch between fluorescent inspection and flaw location. A unique dual-intensity feature provides both high and standard UV-A <u>and</u> white light output for added versatility.

The lamps' broad-beam configuration produces an extremely wide coverage area, making them ideal for both handheld and in-line applications. Models are available either with or without integral black light filters to meet <u>your</u> specific inspection requirements.

#### **FEATURES:**

- Dual-intensity capability: High setting produces a nominal steady-state UV-A intensity as high as 8,000 μW/cm<sup>2</sup>; standard setting produces a nominal steady-state intensity of 4,500 μW/cm<sup>2</sup>, both at 15 inches (38 cm)
- Extremely large coverage area of up to 6 inches (15 cm), with a minimum UV-A intensity of 2,000 μW/cm<sup>2</sup>
- Low visible light emission <u>less</u> than 2 foot-candles (22 lux)
- Conveniently located rocker switches for quick and easy control of light sources
- Built-in fan keeps LEDs cool to maintain optimum light output during extended use
- Rubber bumper with Borofloat<sup>®</sup> glass lens protects LEDs from damage
- Rugged, modular construction allows for easy field serviceability
- Lamp handle pin receptacle allows for easy attachment of various Spectroline<sup>®</sup> mounting accessories for in-line inspection applications (accessories sold separately)
- Choice of standard 8 foot (2.4 m) or extra-long 20 foot (6.1 m) heavy-duty power cord with AC plug and rubber boot. Also available: Optional industrial power supply or in-line power supply with cord sets (sold separately). All power supplies available in 120V, 230V, 240V and 100V models.
- UV-absorbing spectacles and soft carrying case included

#### Also Available:

QUADRAN™ 365M Series portable, battery-operated AC/DC lamp kits. Include QUADRAN™ 365 UV lamp, rechargeable NIMH battery pack, AC and DC cord sets, smart AC charger, UV-absorbing spectacles and soft carrying case.

When the **QDR-365** is in *high intensity* mode, the lamp provides a nominal steady-state UV-A intensity of  $8,000 \mu$ W/cm<sup>2</sup> at 15 inches (38 cm).

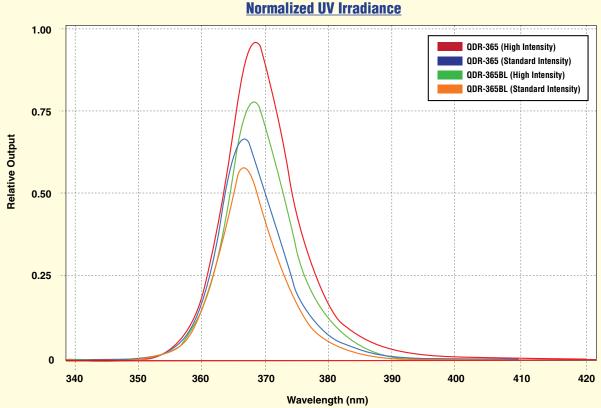

When switched to the *standard intensity* mode, the **QDR-365** provides a nominal steady-state UV-A intensity of  $4,500 \ \mu$ W/cm<sup>2</sup> at 15 inches (38 cm).

In addition, the lamp has a high/ low switch to control the white light LED output.

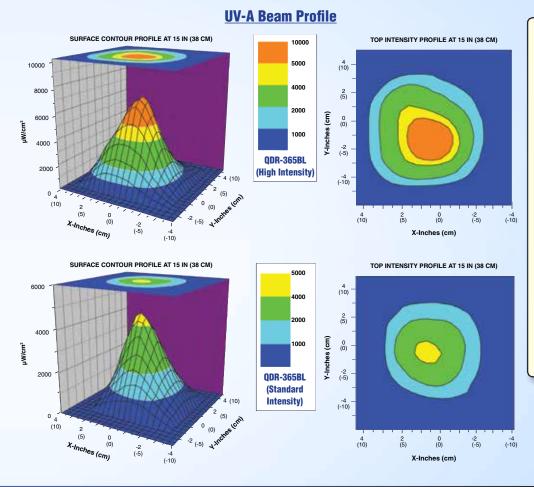

#### Nermelized IIV Irredience

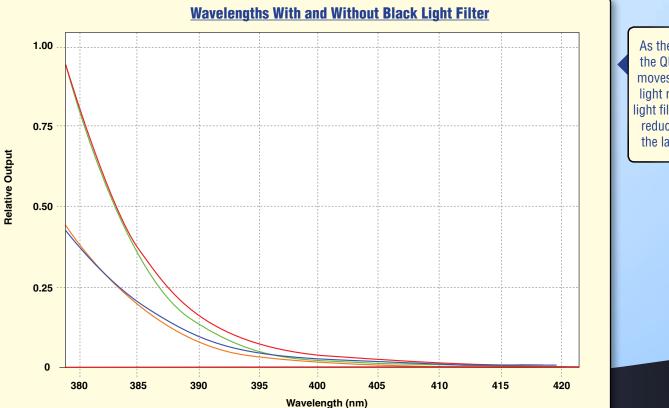

# QDR-365BL Model

The **QDR-365BL** is equipped with a faceplate with <u>integral black</u> <u>light</u> filters that reduce the output of wavelengths longer than 400 nm. When in the *high intensity* mode, the lamp provides a nominal steady-state UV-A intensity of 7,000  $\mu$ W/cm<sup>2</sup> at 15 inches (38 cm).

When switched to the *standard intensity* mode, the **QDR-365BL** provides a nominal steady-state standard UV-A intensity of *4,500 µW/cm*<sup>2</sup> at 15 inches (38 cm).

In addition, the lamp has a high/ low switch to control the white light LED output.

As the wavelength of the QUADRAN<sup>™</sup> 365 moves into the visible light range, the black light filters significantly reduce the output of the lamp at 400 nm. The QUADRAN™ 365 can be quickly mounted for in-line inspections using various Spectroline<sup>®</sup> accessories (FA-100 flexible arm shown).
