LP1

Splitter NDT Inc. is extremely excited to introduce the LP1, a new flagship product. The LP1 is the ideal stand alone liquid penetrant inspection station for the low to medium volume user.

**Educational
Discounts Available**

The LP1 is well suited for aircraft maintenance facilities, non-destructive testing labs, NDT schools and training institutes, government and military facilities, and more!

This system was designed with the needs of our client in mind. Extremely durable, user friendly and cost effective, making the LP1 the new go-to system in the industry

Highlights

- All-in-one system
- Built in 2 (or 3) segments for ease of transport
- Separate wet end + dry end
- Available for all LPI methods
- Designed and built in Canada

Features

- High quality design and construction
- Built with a powder coated steel frame and stainless steel stations
