Tru-Sonic Dual Shear Wave Focused Ultrasonic Probes

Dual Shear Wave Probes offer good near surface resolution as there is no interfering signal at Zero to cover a signal from a near surface flaw. NDT Supply's Tru-Sonic transducers are tuned to provide the best combination of resolution and sensitivity. Certification included with all transducers.

Features

- Probe Crystal Size: Dual: 3.5 x 10 mm
- Good Near Surface Resolution and Sensitivity to Check Out All Hole
- Bandwidth: 75 - 90% (-6 dB)
- Special Design for Checking Thin Plate Pipe Weld Inspection
- Defect Echo Front Noise Less Than 5%
- Certification Included

Frequency (MHz)	Crystal Size (mm)	Probe Angle	Focus Depth (mm)
4	3.5 x 10 dual	45°	10
4	3.5 x 10 dual	60°	8
4	3.5 x 10 dual	70°	6
