

WÖHLER

NEW

**CLARITY FROM
THE OUTSET**
with a 360° panoramic view
for quick results

The new Wöhler VIS 360
Inspection Camera

Made in Germany

PROFESSIONAL DAMAGE ASSESSMENT STARTS HERE

With the new Wöhler VIS 360 Inspection Camera, damage detection is easier and clearer than ever before – and you have everything under control. The 360° pan and 180° tilt camera head offers you a comprehensive all-round view – for fast, precise diagnoses and flawless results. Concentrate on your craft, because the Wöhler VIS 360 is your reliable partner for getting started in professional pipe inspection.

READY TO GO

Thanks to the well-designed and robust all-in-one case system, you can start your inspection within seconds. Open it up, switch it on, and get started.

FLEXIBLE WORKING

The removable monitor makes your inspection even more comfortable: Position the display where you have the best view – completely flexible, even in difficult working conditions. This allows you to keep an eye on every detail and always work in the way that is most practical for you.

CLEAN WORK, EASY CLEANING

The camera head is easy to wipe clean, and the rod can be easily removed and cleaned thanks to a separate compartment in the double-shell case – for hygienic use, day after day.

EXACT LOCALIZATION

Thanks to the integrated transmitter in the camera head, the position can be located with pinpoint accuracy – for fast and reliable damage repair (compatible with the Wöhler L 200 Locator).

BRILLIANT IMAGE QUALITY

The bright TFT monitor delivers razor-sharp images, so you can see every little detail with confidence.

INTUITIVE CONTROLS

The control cross allows you to navigate easily through the menu and control the camera head precisely – simply pan, tilt and always maintain the best overview.

DIRECT DOCUMENTATION

Save live images and videos directly to the device or an USB stick. This allows you to reliably record your work and have it at your fingertips at any time.

TECHNOLOGY FOR DEMANDING APPLICATIONS

The electronic meter counter always shows you the distance on the display, while the position and angle indicators enable precise navigation. With the home function, you can reset the camera to its starting position at any time – for maximum overview and control.

EFFICIENT DAMAGE ANALYSIS

Inspections are child's play with the Wöhler VIS 360. Even complex pipe systems and multiple bends can be navigated with ease.

EVERY DETAIL COUNTS

With optics that can pan 360° and tilt 180°, you can detect even hidden damage in bends or on the top of pipes. This level of flexibility is unmatched in this price range.

Light source:	White LEDs (10 bulbs)
Transmission frequency:	512 Hz / 8.9 kHz / 9.2 kHz

Other inspection cameras VS Wöhler VIS 360 Inspection Camera

X	Monitor unit, camera and reel must be connected manually before each inspection	✓	Ready for immediate use: Set up, switch on and get started
X	Open reel systems contaminate the application site after use	✓	The case leaves your working environment clean: Simply stow the camera push rod in the case after inspection
X	Complicated cleaning of camera head and rod, as the spring on the camera head collects dirt and can get stuck in the tube	✓	Easy cleaning: Camera head and push rod only need to be wiped down and are ready for the next use
X	The components of the inspection cameras must be stowed and transported individually	✓	The double-sided case contains everything you need for your inspection: The camera, monitor and reel have their fixed place.
X	Service repair times of several weeks	✓	Service orders are completed in just 5 business days
