

Waste Water Treatment Questionnaire

1. Do you want to dump, drain or reuse?
2. What type of penetrant are you using: Water Washable or Post Emulsifiable?
3. How much wastewater does your system create on a daily or weekly basis?
4. How much raw penetrant are you utilizing annually? Estimate if actual numbers are not available, i.e. 5gal, 55gal drum, 2x 55gal drum, etc. per year?
5. Description or drawing of your line including the number and type of rinse tanks.
6. Is there available space adjacent to the FPI line to place the system?
7. Do you have an estimated timeframe or budget?
8. How are you currently processing your wastewater?
