

Conductivity Standards

Calibration Standards:

- Coating thickness standards, e.g. foils
- Ferrite standards
- Conductivity standards
- Many of them with factory calibration certificates

Further Accessories:

Extensive accessories complement our product lines.

- Manually and motor driven support stands for very precise measurements
- Sample holders in different designs
- Protective sleeves for instruments
- Adapters
- And much more to facilitate daily use

Precise measurement on curved anodised parts using the V12 BASE support stand and the curvature-compensated probe FTD3.3
