

ITI HANDHELD VIDEOSCOPE SERIES

ITI Handheld Videoscope

High quality and feature rich with a competitive price tag, the compact ITI Handheld Videoscopes deliver big value.

APPLICATIONS:

- Auto engines
- Aircraft engines
- Power generation
- Manifolds
- Valves
- Portable battery applications
- And more

PROBE DIAMETERS measure 4.5mm (.18") to 8.4mm (.33") and working lengths measure 1.5m (5') to 6m (19.7').

DURABLE braided probe delivers maximum range of motion and visibility.

One-thumb, motorized, 4-way **ARTICULATION** enables precision and control.

LIGHTWEIGHT at .95kg (2.1lbs), wireless, with a rechargeable Li-ion battery that lasts more than four hours mean comfort for the duration of inspection.

The **CAMERA** and high intensity **LED ILLUMINATION** deliver superior image and video output on a SD card. No need for complex, proprietary software. Simply plug the SD card into a tablet or computer via standard USB port.

Instrument Technology, Inc.

ENGINEERING SPECIFICATIONS

ITI Handheld Videoscope

The ergonomic design enables

- One hand operation with an intuitive interface
- Easy to maneuver, joystick-controlled articulation
- Ample 4.3" high resolution display

Lightweight and wireless, ITI Handheld Videoscopes are

- Ideal for use in limited access areas or in spaces that are difficult to navigate such as stairs or ladders.
- Durable, waterproof and oil resistant even in the most challenging environments
- Extremely easy to use, even while wearing protective gloves

Repair service is available at our US headquarters, offering quick turnaround and fair prices.
