

## DT-100 Portable Digital Densitometer

### Features:

- The DT-100 is designed to easily and accurately measure film density directly on the film viewer, where the areas of interest are most easily viewed.
- Perfect for mobile darkrooms and auditors
- The measuring range covers 0 to 4.5D with an accuracy of  $\pm 0.003D$  with a 3mm diameter aperture.
- The film viewer simply places the film on the viewer, places the probe on the film where the reading is required, and the reading will appear on the 4-digit LCD screen with light illuminated display.
- A low battery warning indicator is provided on the digital display
- The DT-100 comes complete with a storage bag

- Range: 5,000 – 1,000,000 Lux
- Density: 0 – 4.5D
- Optical Aperture: 3mm diameter
- Probe: Temperature compensated
- Display: LCD
- Accuracy:  $\pm 0.003$  D
- Resolution: 0.01 D
- Repeatability: 0.02 D
- Warranty: 5 years parts, 1-year labor
