Metal Alloy Sample Kits

Metal samples kits include commonly used metals for non-destructive testing. These Kits can be very useful in performing comparison tests:

- Chemical Spot Test
- Eddy Current Sorting
- Thermoelectric Sorting
- X-Ray Spectrographic

Reference Kit No. MI-MS-KR5100 contains 44 different alloys

Reference Kit No. MI-MS-KR5101 contains 54 different alloys.

Additional slots are provided with the kit to expand the selection of alloys to meet your specific requirements. The chemical analysis of each alloy in the kit has been tabulated from mill test reports and certified chemical analyses. These test results are recorded on a thumb drive that accompanies the assortment.

Alloy specimen sizes can be either 1" x 2" x 1/16" or 1" x 2" x 1/8".
The alloy specimens have a glass bead blasted finish.
