

## RADAC INTENSIFYING SCREENS

**RADAC®** the Worlds #1 Lead Intensifying Screens, quality assured to provide higher intensification, increased sensitivity, reduced exposure times, and better contrast, time after time.

### Quality Assured

Rigorous quality control throughout the production process ensures that RADAC Lead Intensifying Screens are free from defects that could interfere with the interpretation of the image.

### Flexible & Durable

The high-quality backing used in the production of RADAC screens means that they can be bent repeatedly to a small radius without cracking, resulting in a lower whole-life cost.

### High Intensification

RADAC Lead Intensifying Screens deliver higher intensification, increased sensitivity, reduced exposure times, and better contrast.

### Full Range of Thicknesses

RADAC screens are available in the following thicknesses:

- ✓ (mm) 0.05, 0.1, 0.125, 0.15, 0.2, 0.25, 0.5, 0.75, 1.0, 1.25, 1.5, 2.0, 2.5 and 3.0.
- ✓ (in) 0.002, 0.004, 0.005, 0.006, 0.008, 0.010, 0.020, 0.030, 0.040, 0.060, 0.080, 0.120

Pairs of any thickness combination can be supplied.

### Full Range of Cut Sizes

The Screens are available in all standard metric and imperial sizes and are cut according to BS3490:1985 or ISO 5655-1982. Custom size screens can be manufactured to order.

### Premium Materials

The high-quality un-coated lead used in RADAC screens results in higher intensification and an absence of problems associated with lacquer coatings and other products.
