

Rotex **ULTRA Jr** Series Silver Recovery Machine

The Rotex ULTRA Jr Series Silver Recovery Units are designed for low cost, compact, efficient silver recovery. Ideally designed with the small producer in mind. Combined with the Rotex Silver Recovery Canister the Ultra Jr series makes a self contained system for electrolytic recovery of silver from

X-ray (radio-graphic)
Graphic Arts
Color film (C-41 Process)
Microfilm
Black & White film

Unit	Recovery Capacity (troy oz/hr)	Tank Size (gal)	Plating Current (amps)	Dimensions
Ultra Jr	0.35	1.0	2.8 (fixed)	13.5" x 9.25" x 9.25"
Ultra Jr+	0.35	1.0	0.2 – 2.8 (variable)	13.5" x 9.25" x 9.25"
Ultra 4C	0.60	1.5	0.2 – 2.4 (variable)	15" x 9.25" x 9.25"

All machines are available in Flow Through or Batch configurations and as 115 volt OR 230 volt systems.
